AURA™
Natural Wall Plasters

WHO WE ARE

Desert to Mountains is dedicated to revolutionizing living with eco-friendly solutions that benefit everyone. Inspired by India's diverse ecological heritage, from the Thar Desert to the Himalayas, we promote a healthy lifestyle in harmony with nature. Our commitment to sustainability ensures our products benefit both, the consumers and the environment.

WHAT WE DO

We create 100% organic products that promotes a nature forward lifestyle. We source the finest natural ingredients to integrate wellness and environmental responsibility into daily life. Our products support sustainable development and foster a deeper connection with nature.

AURA NATURAL WALL PLASTER

Crafted from organic, sustainable ingredients, Aura Natural Wall Plaster utilizes locally-sourced, eco-friendly materials to achieve a stunning wall finish and outstanding performance. Offered in a variety of customizable shades, it presents a versatile and economical option for contemporary construction.

CONSTRUCTION BENEFITS

Simplifies Construction: No need for sand and cement, streamlining the process and reducing material handling.

Direct Brick Application: Can be applied directly to bricks, increasing efficiency and reducing labor.

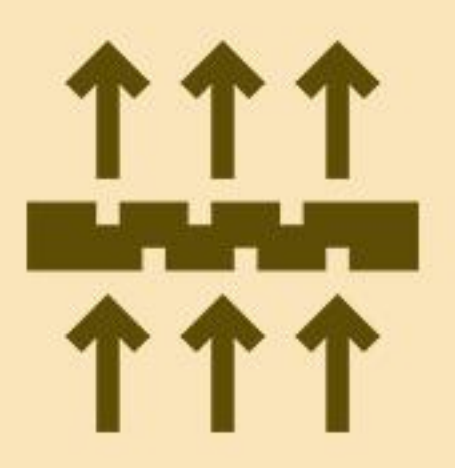

No Curing or Punning: Eliminates the need for water curing and POP punning, saving time and resources.

Superior Insulation: Provides excellent thermal insulation, maintaining indoor temperatures and cutting energy costs.

Cost-Effective: Cheaper than traditional materials, offering significant savings on construction expenses.

Breathable Material: The plaster's breathable nature prevents moisture buildup and the risk of mold & mildew.

ENVIRONMENTAL BENEFITS

Improves Indoor Air Quality: Enhances indoor air quality by reducing pollutants, creating a healthier living space.

VOC-Free: Contains no volatile organic compounds, ensuring no harmful chemicals are released into the air.

Conserves Water: Eliminates the need for water curing, significantly saving water during construction.

Reduces Sand Use: Decreases reliance on sand, aiding in the conservation of this vital natural resource.

High Sustainability: Made with sustainable ingredients and eco-friendly processes, promoting green building practices.

USE CASE #1- APPLICATION ON REGULAR BRICKS OR STONES

1 Unit of 25 Kg Aura Natural Wall Plaster can cover approximately 20 sq/ft area.

Gives a smooth and levelled finish of approximately 12-15mm thickness.

Cost-Effective: Cheaper than traditional methods & materials, offering significant savings.

USE CASE #2- APPLICATION ON AAC BLOCKS

1 Unit of 25 Kg Aura Natural Wall Plaster can cover approximately 35 sq/ft area.

Gives a smooth and levelled finish of approximately 8-10mm thickness.

Cost-Effective: Cheaper than traditional methods & materials, offering significant savings.

USE CASE #3- APPLICATION ON CONCRETE OR PLASTER

1 Unit of 25 Kg Aura Natural Wall Plaster can cover approximately 55 sq/ft area.

Gives a smooth and levelled finish of approximately 4-6mm thickness.

Cost-Effective: Cheaper than traditional methods & materials, offering significant savings.

NOTE: ABOVE USE CASES ARE LIMITED EXAMPLES. ACTUAL USAGE MAY VARY FROM PROJECT TO PROJECT

COLOR SHADES
